

AERO Studio - 2023.1.43.0

Enhancements

- Improved slotting performance for external models
- Improved performance for certain scene drawers
- Circle Fill now uses the new drawer/raycast system
- Improved stability of hover tests by reducing launch speed and raising the minimum height

Bug Fixes

- Fixed issue where submitting bug reports didn't work because of player log file permissions
- Fixed issue where show length was not being calculated correctly
- Addressed excessive memory allocation for slotting external model scene objects
