

AERO Studio - 2024.1.1.0

Changes

- Changed default values for staggered land
- Defaults start project window to show recent files

Bug Fixes

- Fixed empty scene object appearing for non-dev builds
- Fixed formatting for event text in the inspector title element
- Fixed launch event not being updated when modifying launchpad parameters
- Fixed drone preview not updating when objects are modified
- Fixed inspector not destroying UI for previously selected object in some cases
- Restores automatically adding lighting layer when creating a light mixer
- Fixed an exception that could occur with the path modifier
